$\qquad$

Use each sample to draw inferences about the population.

1. Sully surveys 200 random people from Ohio. 150 of the people he surveys prefer the Bengals over the Browns. There are about 11.5 million people in Ohio. According to his sample, how many people in Ohio prefer the Bengals over the Browns.
2. Mr. Kelly loves the game rock, paper, scissors. He creates the table below showing how often he throws each item.

| Item | Percent |
| :---: | :---: |
| Rock | 45 |
| Paper | 30 |
| Scissors | 25 |

If Mr. Kelly plays 60 times...
a. Predict how many times he would throw paper.
b. Predict how many times he would throw scissors.

Describe each distribution as Normal, Skewed Right, Skewed Left, Uniform or Bimodal

Answers to Corrective Assignment

| 1. 8.625 million people | 2a. 18 times | 2b. 15 times |
| :--- | :--- | :--- |
| 3. Skewed Left | 4. Skewed Right | 5. Normal |
| 6. Uniform | 7. Bimodal | 8. Skewed Left |
