

Corrective Assignment

Simplify each expression.

1. $3y + 4 + 2y + 5$

2. $8 + 5a + 2 + 3a$

3. $5r + r + 4$

4. $8x + 5 - 2x + 5$

5. $9 - 4t - 3 + 2t$

6. $5w - 3w + 9 - 5$

7. $6c + 8d + 2c - 5d$

8. $10 - 4h + 3$

9. $6a - 7 - 2a + 5$

Translate to an algebraic expression.

10. Three times a number p decreased by four.

11. The product of a number and six increased by that number.

12. The difference of a number and eight.

Write an algebraic expression for each situation. Answer the question.

13. You have a bag with 18 gummy bears. You eat 2 gummy bears every minute. How many gummy bears will you have in m minutes?14. David has x amount of money. He divides it evenly to 5 people. How much does each person get?

ANSWERS TO 4.2 CORRECTIVE ASSIGNMENT

1. $5y + 9$	2. $10 + 8a$	3. $6r + 4$	4. $6x + 10$	5. $6 - 2t$
6. $2w + 4$	7. $8c + 3d$	8. $13 - 4h$	9. $6a - 2$	10. $3p - 4$
11. $6n + n$	12. $n - 8$	13. $18 - 2m$	14. $\frac{x}{5}$
